

How well does the health care system in Montana

work for people of different racial and ethnic groups?

In Montana, **White people** experienced the **highest health system performance**, scoring in the 68th percentile among all population groups nationally.

AIAN people experienced the **lowest health system performance** in the state, scoring in the 3rd percentile.

Compared to other states in the Rocky Mountain region, Montana has more severe racial and ethnic health disparities.

Health System Performance by Race/Ethnicity

Each column is a racial/ethnic group, and each point represents a state. Performance represented as percentiles (1–100). Montana performance percentile highlighted. No highlighted dot indicates overall performance data not available for that group.

Population by race/ethnicity (2022)

	Montana	Rocky Mountain	United States
Total	1,104,348	12,687,430	328,403,052
AANHPI	8,101 (<1%)	350,276 (3%)	19,862,655 (6%)
AIAN	57,488 (5%)	126,971 (1%)	1,688,543 (<1%)
Black	3,532 (<1%)	258,779 (2%)	38,460,950 (12%)
Hispanic	47,613 (4%)	2,169,783 (17%)	62,818,758 (19%)
White	924,268 (84%)	9,181,432 (72%)	189,511,136 (58%)

Notes: AANHPI = Asian American, Native Hawaiian, and Pacific Islander. AIAN = American Indian and Alaska Native. “—” means data not available. Rocky Mountain states include CO, ID, MT, UT, WY. How well does the health system in Montana work for people from different racial and ethnic groups, and across different dimensions of care?

AANHPI

An overall ranking for AANHPI people in Montana is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	insufficient data

AIAN

Montana ranks 7th of 10 states where calculation was possible, indicating health system performance for AIAN people in the state was among the worst compared to other states. Specifically:

Health outcomes ranking:	8 (of 10) is among the worst
Health care access ranking:	4 (of 11) is among the best
Health care quality ranking:	6 (of 11) is among the worst

Black

An overall ranking for Black people in Montana is not available because of insufficient data.

Health outcomes ranking:	insufficient data
Health care access ranking:	insufficient data
Health care quality ranking:	insufficient data

Hispanic

Montana ranks 29th of 47 states where calculation was possible, indicating health system performance for Hispanic people in the state was worse than average compared to other states. Specifically:

Health outcomes ranking:	45 (of 49) is among the worst
Health care access ranking:	14 (of 48) is better than average
Health care quality ranking:	36 (of 48) is worse than average

White

Montana ranks 34th of 51 states where calculation was possible, indicating health system performance for white people in the state was worse than average compared to other states. Specifically:

Health outcomes ranking:	10 (of 51) is better than average
Health care access ranking:	43 (of 51) is worse than average
Health care quality ranking:	44 (of 51) is worse than average
